Product Description

The USB Arc Lighter is a flameless, windproof and environmental friendly product, adopting innovative technology that replaces the traditional flame with a high-intensity electric arc, and can quickly light cigarettes, candles and much more. Powered by a rechargeable lithium battery, it can be charged and discharged hundreds of times. Simply connect it to any powered USB port and you are ready to go. The sleek and elegant design features no button on the body. Creating the electric arc by one simple shake and it will automatically disconnect in a few seconds — safe and easy to use.

How to use

1. Open the lighter cap;
2. Simply shake or fling it, or place it downward sloping > 90° in any directions to ignite the arc;
3. Touch your cigarette to the arc spark to ignite;
4. Close the lighter cap to disconnect the arc, or it will automatically disconnect after 7 seconds.

How to charge

The Micro USB port located at the bottom is only used to charge the product. Insert the provided charging cable into the USB interface, and connect it to the computer, cell phone charger or any other USB power source which has DC 5V±0.5V output voltage and output current below 3000mA.

At the first time you use this USB lighter, or after long time unused, please connect the charger, then disconnect and reconnect the charger to start charging.
With the built-in intelligent charging circuit, the charging indicator located at the bottom will light on to indicate that the charging process has started.

It takes about 2 hours to fully charge the battery. The charging indicator will automatically turn off after a full charge.

When the battery capacity is low, the arc spark becomes thinner and the charging indicator will flash. Please charge the product in time.

**Warning**

The USB Arc Lighter is a precision product with highest quality and safety standards. Please strictly abide by the following safety measures.

Keep product out of reach of children.

Dropping the lighter may damage internal components.

Please do not let anybody take this product apart, except professional maintenance technicians.

Do not put this product into fire, water or other liquid, so as to avoid explosion or short circuit.

Keep the product away from any people’s face, skin and combustible material; Make sure the arc spark has been extinguished after use.

Do not touch the electric arc.

During daily use, some cigarette tar may remain at the two arc terminals. Regularly use wipe or tissue to clean the terminals so that the normal ignition wouldn’t be affected.

Keep the product away from the fire or heat source which is more than 50°C.

Avoid of longtime direct sunlight. Otherwise it will cause overheat, fire, function recession or service life reduction.
